ANON-KSAR-NKZ5-S	See comments for HE5 below	Response: no change
ANON-KSAR-NKDW-5 Littleton and Harestock Parish Council	<p>The Local Plan is seen by WCC as a key document to deliver sustainable development and support its ambitions to achieve a carbon zero district. The Local Plan will be subject to regular reviews between now and 2039 and understanding both the effectiveness of the polices and how successful (or otherwise) they are, will inform those reviews. How the monitoring of policies will be undertaken is set out in chapter at the end of the document. The focus appears to be limited to monitoring decision of planning applications and appeals. Littleton and Harestock Parish Council considers that a more comprehensive approach to monitoring should be set out which would assess the outcomes and the effectiveness of the full range of the Plan's policies and the decisions arising from them.</p> <p>Note: This comment applies to all monitoring activities.</p>	<p>Comments welcomed and noted</p> <p>Although the Authorities Monitoring Report does use planning applications and appeals, this makes up for a small percentage of all the data used in the report. Data and information is also used and analysed from Hampshire County Council for housing completions and commitments including affordable, market, house type and location of dwelling in relation to policy. Information is also attained from Hampshire County Council and Hampshire Biodiversity Information Centre for biodiversity updates as well as economic data such as business class losses and gains</p> <p>Recommended response: No change</p>

<p>ANON-KSAR- NKTV-M Compton and Shawford Parish Council</p>	<p>Think that there should be input from the parish that the development is in as to whether the completed development is appropriate for the area</p>	<p>Comments noted</p> <p>The council are happy to receive feedback once the development has completed. The parish council has and will continue to be involved in the site allocations selection during the Local Plan regulation 18 and 19 and the appropriateness of the methods used to monitor the policies also includes how quantifiable they are which this would be difficult to measure.</p> <p>Response: no change</p>

ANON-KSAR-NKTV-M	Think that there should be input from the parish that the development is in as to whether the completed development is appropriate for the area	This would be required during the planning application process and not in the monitoring of the development or policy

Compton and Shawford Parish Council		Recommended response: no change
